DESCRIPTION

The EXP-B Series is engineered for installations in the harshest of conditions where moisture, dirt, dust, corrosion and vibration may be present, or NEMA 3 and 4X areas where wind, water, snow or high ambient temperature can be expected.

Used in areas where flammable vapours, gases, and combustible dusts are present as defined by the NEC and IEC. For example gas stations, storage facilities, drilling rigs, manufacturing plant, chemical plants, marine terminals and grain elevators.

The larger sized 80W, 100W, and 150W are ideal for large areas, or high bay applications.
