### DESCRIPTION

A solid PVC fixture using metal lens clips for durability. The system uses two cool white lamps and one red lamp for a back up or emergency lighting system.

### FIXTURE FEATURES

- Housing and diffuser are made of self-extinguishing polycarbonate
- Enclosure impact proof
- Fire proof
- High temperature proof
- IP65 rating
- Holds three T8/T10 lamps
- Standard lens clips are polycarbonate or optional metal

### LED LAMP FEATURES

- The fixtures can be ordered with any of the LED tubes available
- Solid state lighting device, works well in harsh environments of hot or cold temperatures
- Instant on, no warm up time required
- Lasts 10 times longer than fluorescent
- Low EMI emissions, to eliminate radio interference
- Designed to replace conventional fluorescent lamps
- Vibration proof features
- Lead Free compliant, Mercury Free
